## age protect - with the antioxidant effects of aloe vera blossom

This innovative anti-ageing range combines powerful natural ingredients to effectively reduce the visible effects of skin ageing.

Alongside a base of pure aloe vera juice, the main ingredient is the precious nectar of aloe vera blossom. New and unique in the cosmetic market, Santaverde processes this rare active ingredient into an antioxidant beauty elixir. The nectar offers protection against free radicals, oxidative stress and strengthens the skin's resistance.

A unique complex of active ingredients from plant roots, inspired by European phytotherapy and traditional Chinese medicine, reduces the appearance of pigmentation problems, soothes hyperpigmentation and stimulates the synthesis of collagen.

Fine oils of apricot and primrose strengthen the skin's elasticity, leaving it relaxed and supple.

The intensively regenerating age protect range works synergistically, providing demanding skin with everything it needs for a radiant, gently smoothed and even complexion.
