

Rosenrot

NATURAL COSMETICS HANDCRAFTED IN GERMANY

*„Care for detail, passion for craftsmanship,
commitment to the highest quality and
respectful relationship with nature
... that is Rosenrot.“* Karin Ziesmer, Founder

Rosenrot is a pioneer in the field of natural and sustainable hair and body care.

We develop certified, highly active natural cosmetics that are biodegradable and free of plastic. We use the most original, natural raw materials possible, such as petals, roots, healing chalk, clay and plant oils.

With years of experience, we at Rosenrot work daily to develop high-quality natural formulations which represent an ideal balance between nourishing effect, intensive cleansing and naturalness.

We focus on a responsible, respectful and mindful relationship with nature and its resources. The yield from our care products makes resource-saving manufacturing and packaging processes possible. To illustrate this, one ShampooBit replaces the contents of a standard shampoo bottle many times over.

Our sustainable products are lovingly handcrafted in our manufactory on the north coast of Germany in wonderful Eutin, the city of roses. From here, we deliver innovative products in fine organic quality for the most sophisticated skin and hair care demands, without compromise and with a clear conscience.
