

**SOL DE
IBIZA**

**The totally natural and
highly effective sunscreen**

Why Sol de Ibiza?

It's important to pick a safe sunscreen, but why it's important to wear sunscreen?

Sunburn, premature skin aging, and — the big one — skin cancer. The sun is no joke!

Are you paying attention to the type of sunscreen you use?

The sunscreen is either absorbed into your body, washed off into the water you swim in, or both. It affects the coral reefs, the fish, and other sea creatures.

There is particular concern about the absorption of oxybenzone & octinoxate, ingredients commonly used in certain types of sunscreens.

The ingredients in your sunscreen really do matter when it comes to the health and safety of you, your family, and the big, beautiful ocean we splash around in!

How can Sol de Ibiza be so effective and innocent?

Certified natural and organic ingredients, Non-Nano Zinc Oxide as a filter, Aloe Vera from Ibiza, we never use fragrances or preservatives, we're vegan and never tested on animals and we are reef-safe. Plus, we use plastic-free packagings only!

Chemical vs Mineral filters

Chemical sunscreens have ingredients (oxybenzone, avobenzone, octisalate, octocrylene, homosalate, and octinoxate) that may potentially cause health problems. According to some recent researches they seep through the skin into the bloodstream after only a couple hours. These chemicals persist in the blood for up to seven days and exceed, by up to 40 times, the allowed limits.

Mineral sunscreens, on the other hand, use two natural minerals - zinc oxide and titanium dioxide - as active ingredients. These minerals simply sit on top of your skin and protect it by reflecting away UV rays. The American authorities (FDA) have defined these filters Generally regarded as safe and effective.

So, mineral sunscreen is the way to go!

Our filter

Zinc oxide is the best of the two mineral sunscreen active ingredients because it is truly a broad-spectrum blocker. That means it protects you and your family from both UVA and UVB rays.

But what is Non Nano Zinc Oxide?

Zinc oxide sits on top of your skin (rather than soaking in, like chemical sunscreens do) and protects you by scattering, absorbing, and reflecting the sun's rays.

What about the "Non-Nano" part?

One nanometre is one-billionth of a meter, meaning a nanoparticle is a particle smaller than 100 nanometers. Therefore, a non-nano particle is larger than 100 nanometers.

The concern with these super-small nanoparticles is that they might find their way into your body by penetrating your skin and getting into your bloodstream. And while a nanoparticle will potentially enter your bloodstream, a non-nano particle won't. For that reason, non-nano is considered safer.

Plus, nano-sized particles are so small that they could be ingested by aquatic organisms, and we don't want that either.

No more plastic

We have achieved, from the very first tin of sunscreen made, a product that involves absolutely **zero waste**.

Most of our ingredients are selected with the premise that they can be used in all of our products. We also take a lot of time and precision to make sure the quantities we produce match the demand, so nothing is wasted.

The cosmetic industry is the third most polluting industry, after automotive and fashion.

At Sol de Ibiza, we chose to avoid using plastics, even those recycled.

We use metal tins which are widely recyclable and can be kept and used for multiple purposes.

Our paper and cardboard stick are also highly biodegradable.

Certifications

You can trust Sol de Ibiza!

The protection factor (SPF / UVB) of our products, the UVA protection and the water resistance are certified from third parties laboratories.

All our organic ingredients are certified by AIAB.

The “Look for the Zero” logo guarantees that products are 100% free of microplastic ingredients.

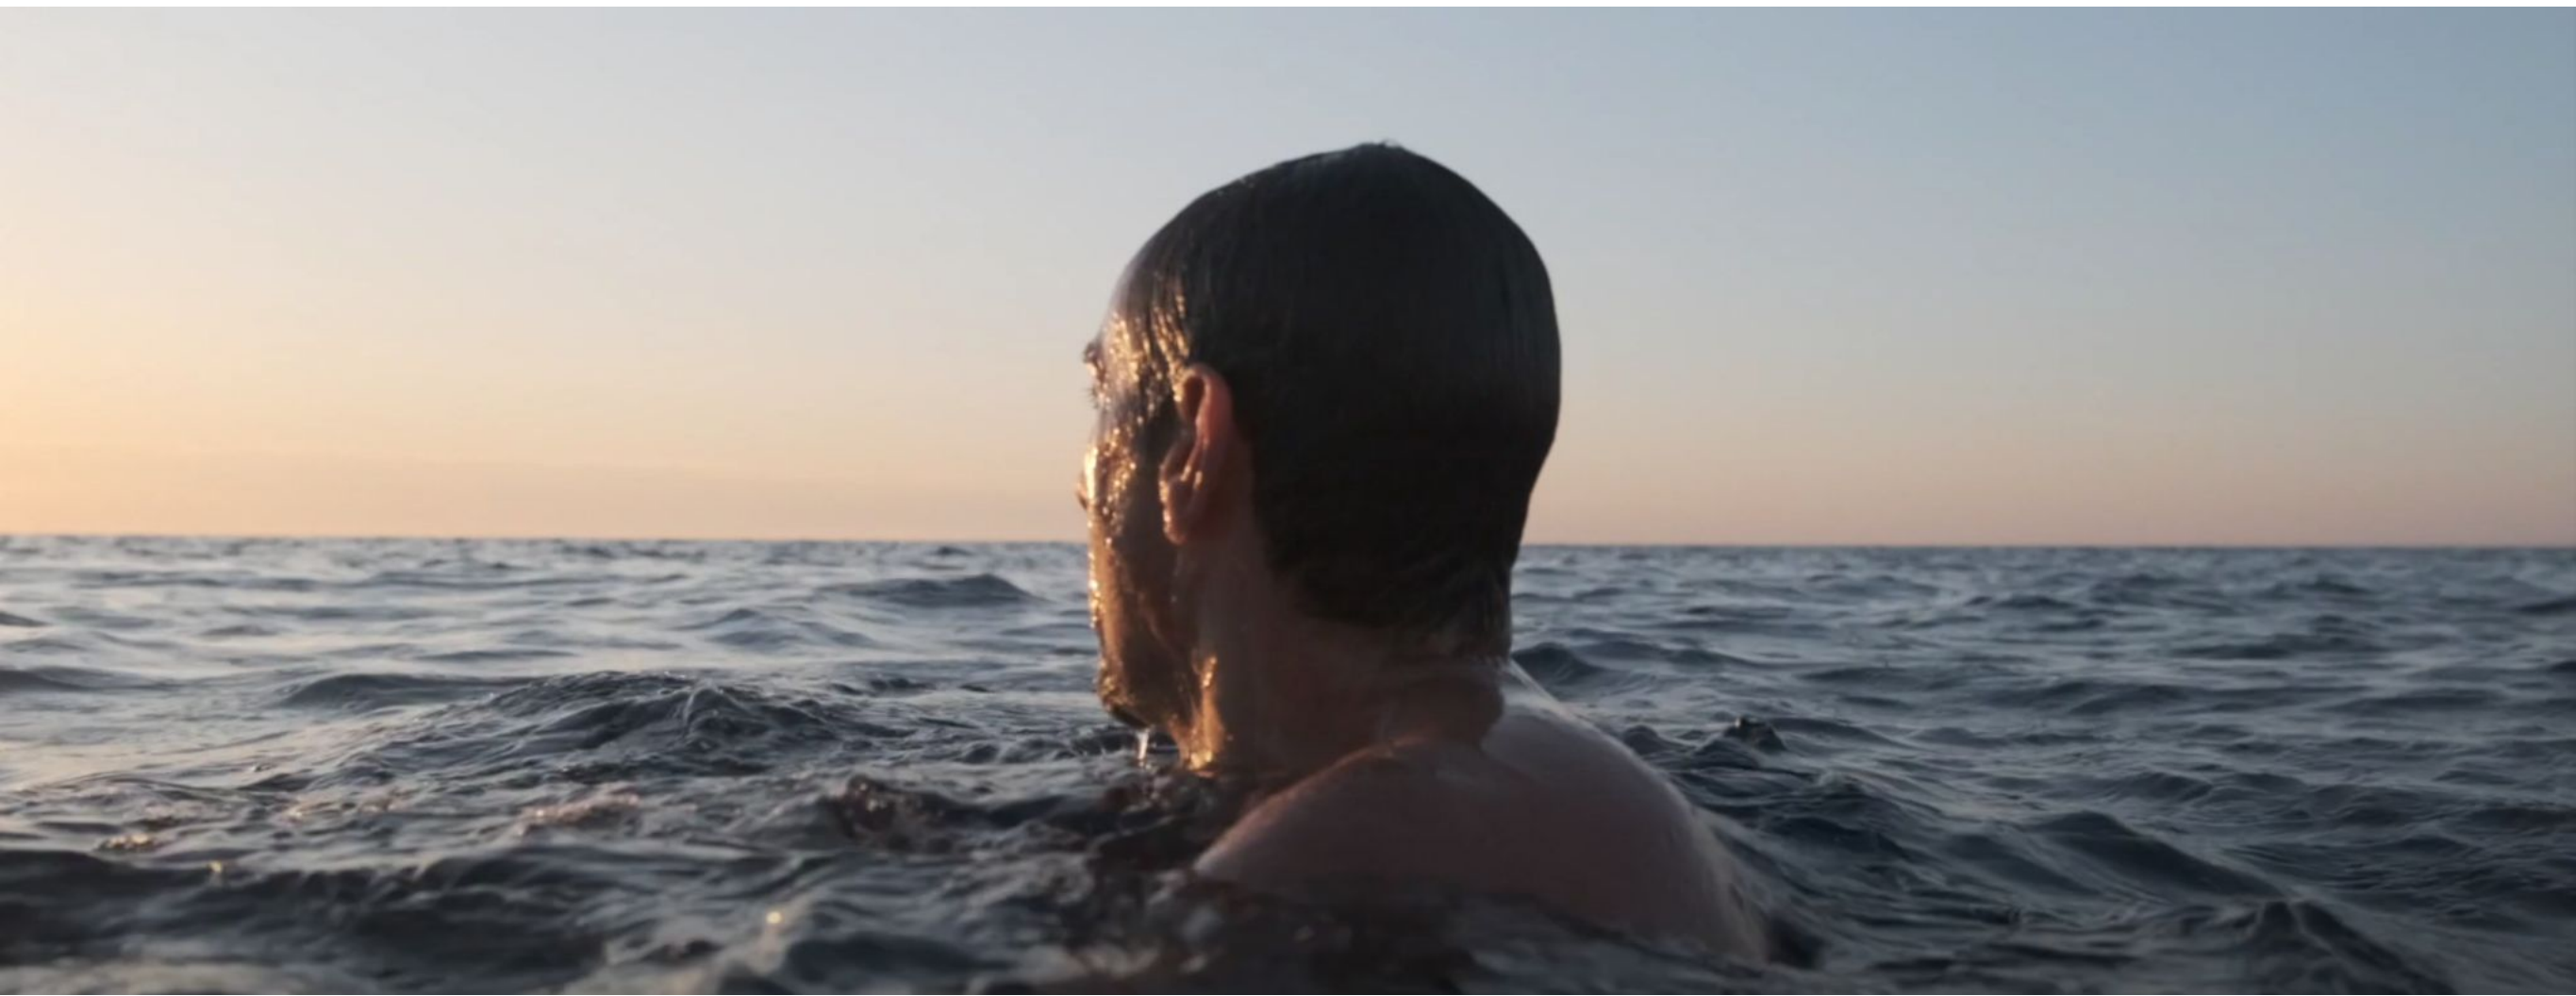

Our Story

Sol de Ibiza is the leading european brand of sustainable sunscreens.

The story of Sol de Ibiza is the story of Alessandro Mancini, an open water swimmer who moved to Ibiza in 2015, fell in love with the beautiful deep Mediterranean waters and after three years of research created the world's fairest sunscreen, made by natural ingredients only, which is good for kids, adults and the environment.

Sol de Ibiza is sold by hundreds of retailers all over Europe and keeps growing!

Awards

Sol de Ibiza has been selected by **Cosmotrend**, the annual report on beauty trends, featuring the most innovative products from Cosmoprof exhibitors.

In 2020, **BEAUTYSTREAMS** has identified product innovations and notable brands among Cosmoprof exhibitors, providing a guide of trends that will lead the market in the next months.

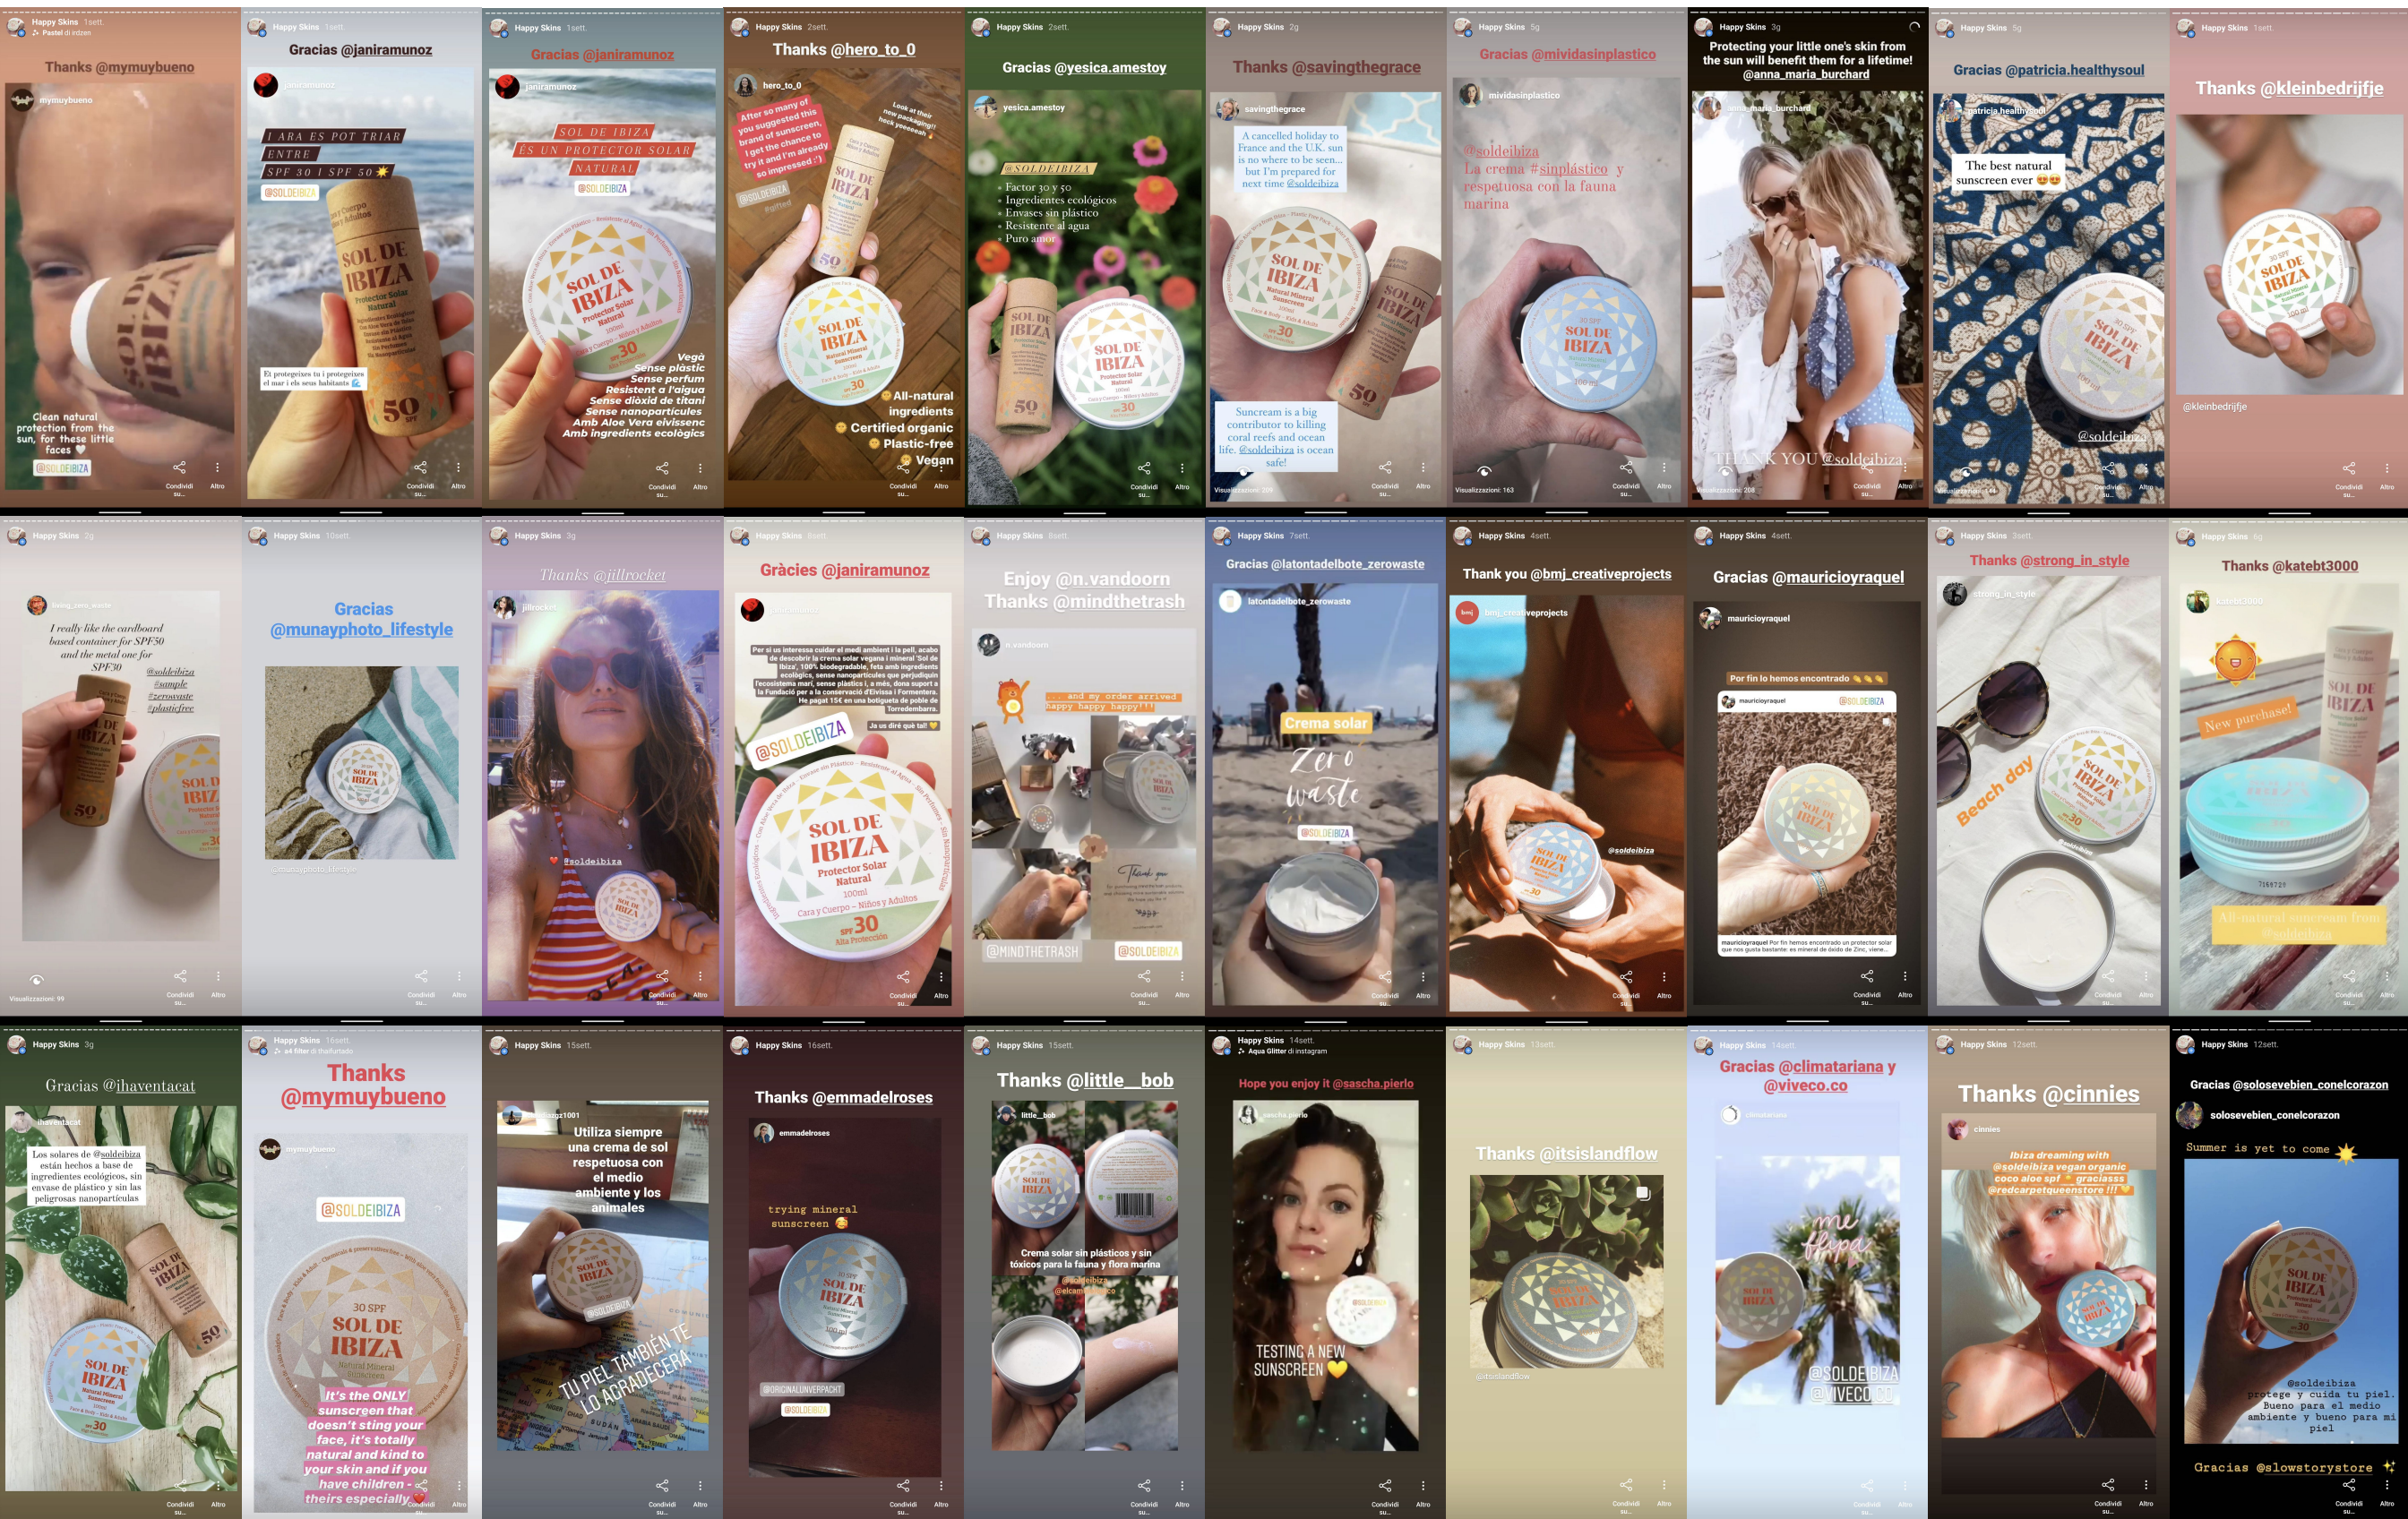

Our SPF 50 face & body stick has won the **NEW SUSTAINABLE PRODUCT Award** by the Sustainable Beauty Awards, organized by Ecovia Intelligence.

In addition, we received the **ORGANICS CLEAN AWARDS** for the best body sunscreen SPF 30.

Our new SPF15 Lip Balm is one of the winners in the **Beauty Shortlist Awards 2022**.

A customer base made of environmentalists, natural cosmetic and zero waste lovers

1% for the Planet

Since the first day, Sol de Ibiza has pledged 1% of sales to the preservation and restoration of the natural environment.

1% for the Planet is an alliance of businesses that understand the necessity of protecting the natural environment. They understand that profit and loss are directly linked to its health, and are concerned with the social and environmental impacts of industry.

From 2019, we decided to give the 1% to Ibiza Preservation, which works to preserve and protect Ibiza and Formentera's land and sea.
